OBJECTIVE

Seeking a Software Engineer Internship opportunity to leverage strong problem-solving abilities, Java proficiency, and full-stack development experience to contribute to enterprise software development while continuously learning and growing.

SKILLS

Languages: Java, JavaScript, Python(Basics), C, SQL

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Authorization

Databases: PostgreSQL

Tools: Git, GitHub, Docker (Basics), Vercel, Render, Postman, Linux, VS Code

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design (Basics)

Cybersecurity: Wireshark, Nmap, FTK Imager

PROJECTS

Wardrobe-IQ | AI Wardrobe & Outfit Recommendation Platform React.js, Node.js, Express.js, PostgreSQL

- Architected an AI-powered wardrobe management platform with a React.js SPA frontend and an Express.js REST API backend, leveraging PostgreSQL through Sequelize ORM.
- Designed and implemented 15+ RESTful API endpoints covering JWT authentication, wardrobe CRUD operations, and image uploads using Cloudinary with local disk storage fallbacks.
- Engineered an outfit recommendation engine using Gemini Vision AI and custom scoring algorithms incorporating color compatibility, weather conditions, and wear history.

Live: wardrobe-iq.onrender.com

DevConnect | Full Stack Developer Networking Platform

React.js, Node.js, Express.js, PostgreSQL

- Built a full stack developer discovery platform with a React.js SPA frontend and a decoupled Node.js/Express.js REST API backend, each deployed independently on Render.
- Designed 10+ RESTful API endpoints covering JWT + bcrypt authentication, profile CRUD, and developer search, backed by a PostgreSQL schema supporting relational data and full-text filtering.
- Engineered advanced search and filtering by tech stack, location, and experience level, improving developer discoverability across the platform.

EXPERIENCE

Summer of AI Intern | IIIT Hyderabad (via VISWAM.AI)

Jun 2025 – Jul 2025

- Built end-to-end ML pipelines in Python (Pandas, NumPy, scikit-learn) including data cleaning, feature engineering, and model training on structured datasets of 10,000+ rows.
- Evaluated classification models using accuracy, precision, and F1-score metrics to identify the best-performing approach for the given dataset.

EDUCATION

CVR College of Engineering

2023 – 2027

B.Tech in Computer Science and Engineering (Cybersecurity)

CGPA: 8.86/10

ACHIEVEMENTS

- Solved 461+ algorithmic problems on LeetCode (Java, C, Python, SQL); achieved a contest rating of 1730 across 35 competitive programming contests, ranking in the Top 11.5% globally.
- Secured 9th place among 117 participants in the Smart Interviews Internal Coding Contest conducted at CVR College of Engineering (Top 8% finish).

CERTIFICATIONS

- Oracle Academy — Database Design (Dec 2024)
- Oracle Academy — Database Programming with SQL (Dec 2024)
- Smart Interviews — Problem Solving Certification (Credential)
- Udemy — The Complete Full-Stack Web Development Bootcamp (Jan 2026)
